# FONTastic™ PLUS

Bitmap font editor for the Macintosh

ALTSYS CORPORATION

FONTASTIC PLUS

FONTastic™ Plus is the most powerful bitmap font editor available on a microcomputer. With it, you can customize any existing character set with your own logos or special characters, create fonts for foreign languages, or use your creativity to create totally new typefaces. FONTastic Plus makes standard bitmap fonts which work with all Macintosh™ software. Advanced features like three levels of magnification, four levels of undo, a background editing plane, and the capability to edit several fonts at once make font editing easy.

You'll be able to define zero width and overlapping characters, simplifying the handling of foreign languages, mathematics, or complex logos. FONTastic Plus even supports kerning pairs and fractional character widths, so the spacing and kerning in all your fonts, including LaserWriter® PostScript® fonts, can be modified to meet the highest typographical standards. You can quickly create the large sized fonts that allow highest quality printing on the ImageWriter® II and LQ, the LaserWriter IISC, and other QuickDraw printers.

You can flip or rotate entire characters or parts of characters to quickly make other characters. Or shuffle characters with cut-and-paste to define your own keyboard arrangement. FONTastic Plus's editing tools include a pencil, eraser, line, filled box, and filled oval or circle. Character styling abilities include bold, italic, outline, shadow, underline, expand, condense, and invert. Print samples are available at any time during font development. Fonts may be scaled up to the Macintosh limit of 127 points high, with independent horizontal and vertical scale factor. An integrated font mover makes installing your fonts as easy as cut and paste. You'll avoid font conflicts by quickly changing font ID's or names.

FONTastic Plus has so much power that most professional type designers (even some big computer and typesetter manufacturers we can't mention) use it for their bitmap editing. Yet it is so easy to use that non-professionals can begin creating new characters immediately. Our customer list would impress you. We'd like to add your name to it.

FONTastic Plus runs on the Macintosh Plus, 512K Enhanced, SE, and II. Not copy protected.

FONTastic Plus. Bitmap font editing at its best.

ALTSYS CORPORATION

720 Avenue F, Suite 109 Plano, Texas 75074 (214) 424-4888

Version 2.0

Solves the problem of conflicting font numbers with the new NFNT-type fonts. Easily creates font families incorporating plain, bold, italic, and bold italic styles.

Suggested retail price is $99.95
